Travel ERP

BLAZEbe[®]
Travel Booking Engine

Contracting
System

Our Flagship Products

A ready to deploy completely online travel ERP. The entire system is available as modules and can be implemented as per the clients business requirements.

It is available on IT4T- managed cloud servers thus ensures better and faster support and maintenance service.

TMO- CRM

A travel mid-office system with travel CRM built-in. It provides consolidation, process standardization, documentation, along with inventory management and structured distribution of processed inventory. It includes Mid-Office, static holiday package management interface with search and book engines, payment gateway integration, enquiry management, quotation building, itinerary building, and complete (manual and auto) booking management using the queue management concept.

A client can, at any point of time, get upgraded system offerings without affecting its already running business processes much.
